

Eat Smart:

Choose Healthful Snacks!

Why did the banana go to the doctor?

Because it wasn't peeling well!

Eat smart by snacking smart.

Think of snacks as minimeals that help provide nutrients and energy you need to grow, play and learn. Most kids do best when they eat four to six smaller meals a day.

Are you eating enough fruit? Let snacks fill in the gaps. If you miss juice for breakfast, try having a piece of fruit, such as a banana, at snack time.

Time snacks carefully. Try eating two to three hours before meals. That way you will be hungry for lunch or supper. Keep snacks small. If you are still hungry, eating more is OK. You decide when you have had enough food to eat.
